DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beser et al (U.S. 6,523,068) and Peckover (U.S. 6,119,101).

As per claims 1,11,19 Beser disclosed in a computer network, a method for obscuring user requests for information comprising: routing a user computer request for information, aimed at another network member, to a first cache memory, if the first cache memory contains the requested information, returning the requested information in response to the user request without releasing the user request to the network member; if the first cache memory does not contain the requested information (col. 7, lines 65-67 & col. 8, lines 1-14); receiving the requested information from the network member; and storing a copy of the requested information in the first cache memory such that user requests for information that can be satisfied by information stored in the cache memory are not revealed to other network members (col. 18, lines 43-52), and user requests that cannot be satisfied by the cache memory are obscured by editing prior to release to other network members (col. 31, lines 37-45).

Art Unit: 2145

However Beser did not disclose in detail editing user identity information contained in the request, resulting in an edited request with obscured identity information, releasing the edited request to the network member.

In the same field of endeavor Peckover disclosed enabling the collection of market information, especially data needed to qualify of various kinds of consumer demand, while protecting the particular identity and privacy of consumers. Consumers, because their identity is protected, feel secure in using the system, thereby generating market data as a by product of their shopping activities (col. 14, lines 15-21).

It would have been obvious to one having ordinary skill in the art at the time of invention was made to have incorporated enabling the collection of market information, especially data needed to qualify of various kinds of consumer demand, while protecting the particular identity and privacy of consumers. Consumers, because their identity is protected, feel secure in using the system, thereby generating market data as a by product of their shopping activities as taught by Peckover in the method of Beser to protect consumer identity and private information while gathering market information.

3. As per claims 2,12,20 Beser-Peckover disclosed further comprising the step of routing the edited request to a second Cache memory prior to releasing the edited request to the network member; and if the second cache memory contains the requested information, returning the

Art Unit: 2145

requested information in response to the edited request without releasing the edited request to the network member (Beser, col. 18, lines 43-52).

4. As per claims 3,13,21 Beser-Peckocer disclosed further comprising the step of. if the second cache memory does not contain the requested information, further editing the user identity information contained in the edited request prior to releasing the edited request to the network member (Beser, col. 31, lines 37-45).

5. As per claims 4,14,22 Beser-Peckover disclosed wherein the computer network is the Internet (Peckover, col. 30, 44-48).

6. As per claims 5,15,23 Beser-Peckover disclosed wherein the user computer request for information is a Uniform Resource Locator (URL) reference string (Peckover, col. 30, lines 44-48).

7. As per claims 6,16 Beser-Peckover disclosed wherein the network member is a server computer (Peckover, col. 17, lines 52-57).

8. As per claims 7,17,24 Beser-Peckover disclosed wherein the first cache memory is resident on the user computer (Peckover, col. 25, lines 10-20).

Art Unit: 2145

9. As per claims 8,18 Beser-Peckover disclosed wherein the first cache memory is resident on a computer remote from the user computer (Peckover, col. 25, lines 10-20).

10. As per claim 9 Beser-Peckover disclosed wherein the editing is performed by the user computer (Peckover, col. 27, lines 33-41).

11. As per claim 10 Beser-Peckover disclosed wherein the editing is performed by a computer remote from the user computer (Peckover, col. 27, lines 33-41).

Response to Arguments

Applicant's arguments filed 06/21/2004 have been fully considered but they are not persuasive.

Response to applicant's argument is as follows.

12. Applicant argued that prior art did not disclose, "Any use of the cache memory or the specific application to which the cache memory is put in applicant's invention".

As to applicant's argument Beser disclosed, "For example, the originating network device may store the private network addresses for the originating and terminating ends of the tunneling association on the originating network device (col. 22, lines 33-35). One ordinary skill in the art knows that the cache is defined as storage space. Every network device consists of storage space.

Conclusion

13. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
